

NAGARJUN SATHYANARAYANA

SAP Project Management Professional | PMP® Certified

✉ nagarjun.sathyanarayana@proton.me ☎ +49 176 7014 7942
📍 Fasanenstr. 67b, 82008 Unterhaching, Germany 📅 1995-03-11

PROFILE SUMMARY

PMP® certified SAP Project Manager with over 8 years of experience in complex IT transformation projects across aerospace and high-tech manufacturing. Expertise in SAP S/4HANA (MM, EWM, PP) implementation, solution design, and end-to-end project lifecycle management. Proven ability to define project scope, budget, and timelines while managing international teams and external IT service providers. Strong background in SCM, PLM, and procurement process optimisation, agile methodologies, and risk management.

PROFESSIONAL EXPERIENCE

03.2025 – Present	SAP Project Manager — Production Operations & Quality, Isar Aerospace SE - Leading the end-to-end implementation of SAP S/4HANA (MM, EWM, PP) across production, inventory, and procurement, steering the full project lifecycle from process analysis and IT tool selection through to go-live and post-implementation adoption. - Acting as ERP Product Owner, managing the product backlog, defining sprint acceptance criteria, and coordinating an external offshore implementation team to deliver technical solutions within a EUR 200K annual budget. - Conducting deep-dive process standardisation workshops with production, procurement, and logistics departments to architect a PLM/PDM to S/4HANA integration, achieving 98% data fidelity and eliminating critical operational errors. - Developing effort and cost estimates for new SAP functionalities, determining project costs in close exchange with business stakeholders and the Enterprise Architecture team. - Engaging 5+ cross-functional leaders across production, quality, procurement, and engineering to manage scope, evaluate technical solutions, and proactively mitigate risks across 4 concurrent transformation initiatives. - Building executive dashboards (Power BI, EazyBI) to communicate project status, track milestones, budget burn-down, and sprint velocity, ensuring transparent reporting to steering committees.	Ottobrunn, Germany
07.2021 – 03.2025	Supply Chain Management Specialist, Isar Aerospace SE - Spearheaded the global rollout of an enterprise inventory management system, collaborating with engineering teams to standardise processes and integrate MES and PDM architectures across the organisation. - Led strategic end-to-end procurement for complex aerospace hardware (engine and launch vehicle components), executing vendor evaluations and contract negotiations across the DACH region with international suppliers. - Collected and analysed operational data to build advanced Power BI analytics dashboards, identifying supply chain bottlenecks and transforming unstructured logistics processes into a standardised, efficient framework. - Coordinated cross-functional teams spanning production, logistics, and quality to ensure seamless material flow for high-criticality aerospace manufacturing programmes.	Ottobrunn, Germany

02.2020 – 07.2020	Purchasing Intern — Global Logistics Services, Robert Bosch GmbH - Analysed complex logistics spend and volume data to baseline vendor performance, systematically identifying operational bottlenecks and driving collaborative improvement initiatives to increase supply chain efficiency. - Acquired and onboarded 5+ logistics service providers during the internship, taking personal responsibility over the lead and sales pipeline in a fast-paced, global procurement environment.	Stuttgart, Germany
07.2016 – 07.2018	Buyer II - Procurement Operations, Lam Research India Pvt. Ltd. - Directed end-to-end procurement operations for highly technical Etch and Deposition product lines, overseeing a portfolio of 20+ strategic suppliers to guarantee zero-downtime manufacturing workflows. - Led a targeted process optimisation project with production and logistics teams, standardising inbound workflows and significantly reducing wafer manufacturing receiving variances. - Partnered with operational leaders to procure critical raw materials, systematically optimising ERP master data to proactively prevent material shortages and improve supply chain reliability.	Bengaluru, India

EDUCATION

09.2018 – 03.2022	RWTH Aachen University, Master of Science — Production Systems Engineering Thesis: Methodology for process selection in the application of process mining within order processing Focus areas: Production management, systems engineering, industrial digitalisation	Aachen, Germany
08.2012 – 01.2017	SIT Tumakuru (Visvesvaraya Technological University), Bachelor of Engineering - Industrial Engineering & Management Thesis: Implementation of Kanban for Minomi Parts Supply (Toyota) Top 10 in the graduating class of 2016	Tumakuru, India

SKILLS & COMPETENCIES

Project Management SAP Activate, Agile & Waterfall, Scope/Budget/Timeline management, Risk management, IT Service Provider management, Solution design	SAP Systems SAP S/4HANA (MM, EWM, PP), SAP Ariba, SAP Signavio, SAP Jules, PLM/PDM integration, MES architecture
Business Intelligence Power BI, EazyBI, Python, JQL, DAX	Tools & Platforms Jira, Confluence, MS Project, Microsoft 365, Linux, Windows, macOS
